Dear Siddarath,

I am pleased to inform you that you have been admitted to the Graduate Division of SMU's Lyle School of Engineering to the Computer Science - MS program for the Fall 2023 term. Congratulations on this important step in continuing your academic career. Your currently assigned academic advisor will be Dr. Ted Manikas. Upon matriculation, please contact your advisor to determine if changes in advising will be needed.

Upon enrollment, you will be required to submit official transcripts from all universities you have attended. These transcripts must include any degrees conferred or awarded, and must be received prior to completing your first term at SMU.

Information about classes being offered for the next semester may be obtained on the [SMU Registrar's Office website](#). Additional information and course descriptions can be found in the [Graduate Lyle School of Engineering Catalog](#). Registration information will be provided prior to the start of the new term. You will be given a website on which you will find all the information required to register.

Disability Accommodations: If you are a student with a disability and anticipate needing accommodations at SMU, please review the [DASS website](#) for more information.

On your applicant status page, you will find an acceptance form where you can reply to your offer of admission. Upon receipt of your acceptance, you will be matriculated into SMU. Please note that in order for SMU to initiate the I-20 process, you must accept your offer of admission on the form provided.

Please contact the Office of Recruitment and Retention at [lylegrad@smu.edu](mailto:lylegrad@smu.edu) if you have any questions.

On behalf of the engineering faculty, staff, and students, I want to welcome you to the Lyle School of Engineering. I hope that your academic experience at SMU is both personally and professionally rewarding. We look forward to your contribution to the SMU academic community!

Sincerely,

A handwritten signature in black ink, appearing to read 'Dinesh Rajan', with a long, sweeping underline.

Dinesh Rajan
